

Pain points across LEAP research

Limitations extracted by Gemini from each paper, grouped by keyword rules (summarize.PAIN_POINTS); a paper counts once per category and can raise several.
~19% of pain points fit no category and are omitted. Values: Figures/pain_points.csv.

(b) % of each domain's papers raising it

Atmosphere (n=156)	Ocean (n=68)	Land & hydrology (n=83)	Cryosphere (n=15)
