

Multi-scale coverage of LEAP datasets

467 of 811 in-scope datasets have a grid spacing and time interval (49 in these panels have a data volume). Coupled-system and idealized datasets not shown. Scales extracted by Gemini, many estimated; process regions traced approximately from the LEAP slide.

● 1 GB ● 1 TB ● 1 PB ○ size unknown coverage (finest scale → extent, record) below ~100 km GCM grid
